

LIKE OUR RAINWATER SYSTEMS? TAKE A LOOK AT OUR ZINC FLAT ROOF EDGING SYSTEM

Finishing a flat roof edge can be tricky. Solutions are often difficult to fix and don't always give the protection needed. The roof edge is critical to the long term performance of a flat roof.

ZincEdge is an innovative roof edging system designed to give long lasting edge protection to a flat roof.

Simple to handle and install, with no tape or welding required, and with corrosion-resistant fixings for a clean, professional finish, ZincEdge is specifically designed for use on small structures which have a flat roof and an edged upstand - ideal for use on garden sheds, garden rooms, pods and small extensions.

- Protects your roof edge in all weathers. Zinc is a durable, resilient environmentally friendly building product.
- Supplied complete with connector, stainless steel screws and neoprene washers to stop water ingress.
- A stylish rolled edge design, finished in natural Zinc which weathers to give a natural grey patina.
- Available in five sizes: 45, 65, 80, 100 and 120mm - to suit various wall edge widths - and a choice of 2 or 3 metre lengths.

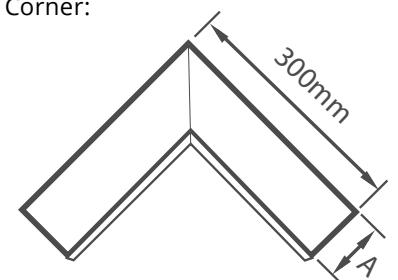

Code	Width = A	Flat Roof Trim Length	Unit price exc. VAT (£)	Online Price exc. VAT
ZE45L2	45mm	2 m	£33.14	£19.89
ZE45L3	45mm	3 m	£46.02	£27.61
