

Adjustable Steel Push-Pull Props

Specifications

- Adjustable Steel Push-Pull Props are designed for holding and plumbing single and double faced forms. The lower plate is fixed to a ground anchor with the top plate being fixed to the shutter.
- The Adjustable Push-Pull Prop includes the standard Prop Collar with an additional locking Collar to maintain rigidity and maximum safety.
- Adjustable Steel Push-Pull Props are available in sizes No.0 to No. 4.
- All our props are manufactured in accordance with the manufacturer's ISO 9001:2000 quality system accreditation.
