

# THE HOME OF METAL GUTTERING

The UK's leading online retailer & stockist of metal rainwater and drainage products for new build, renovation, home improvement and refurbishment.

## CASE STUDY

### Skyline Aluminium Fascia, Soffit & Coping

### Former Nursing Home Site - Jersey

#### JOB SPECIFIC DETAILS/ SCOPE OF WORKS

**Skyline Aluminium Fascia and Soffit provided the perfect finishing touch for four £2 million homes on the site of a former nursing home in Jersey.**

The design of the new homes called for a practical fascia and soffit system which would be aesthetically pleasing and competitively priced. Godel Architects worked with the developer, contractor and the UK manufacturer of Skyline, Alumasc, to achieve the perfect look.

The contractor Contractor, Jeff Russ, specified Skyline because he knew he could rely on it;

- it is easy to handle .
- its lightweight modular design make it easy to fit.
- it is maintenance free,
- it is durable, lasting up to 40years
- and is available in a wide range of colours and design options they knew would look great.

Skyline offer an extensive range and also bespoke options, which means that they can be flexible to the specific design requirements of any project when necessary. For example, the wide soffits and fascia needed for the balconies on this project were engineered to achieve the right product, to the exact specification, within the required timeframe and budget.

Rainclear have a standardised, although still considerable range of Skyline Aluminium Fascia and Soffit profiles and sizes on the website, to simplify and speed-up selection, purchase and delivery for its online customers. We contact you after checkout to confirm the RAL colour required and the exact depth or width from within the size range purchased. But, if you do not find what you need listed on the website, we can also help you access the more bespoke possibilities that are available through Skyline's UK manufacturer.
